ABOUT

After 5 years of graphic design in a marketing environment, I changed careers in 2017 and became a front-end web developer. I've been developing websites ever since. I currently build custom WordPress templates and work primarily in HTML, CSS/SASS, JavaScript and PHP. I specialize in UX/UI and bring a strong sense of leadership and direction to production teams.

EXPERIENCE

Front-End Web Developer, Madden Media
May 2017–Present

Develops custom HTML web pages for client implementation. Additionally, creates and maintains WordPress websites by developing custom themes, working in the WP Loop, and integrating custom functionality like form submission and lead generation. Highly skilled in interfacing with clients, leading team projects, and developing responsive solutions. Works daily in Agile methodology as well as Growth Driven Design framework.

eMedia Web Designer, Madden Media
February 2015–May 2017

Designed rich media ads, banner ads, stand-alone HTML pages, emails, sweepstakes, and social media components.

Marketing Graphic Designer, Madden Media
May 2012–February 2015

Designed brand collatoral in the business to-business realm. Reinforced Madden's identity in the form of print collateral, small publication design, and email template creation.
